

Industrial Automation

Line Card

Specializing in Automation Solutions Since 1985

Modular T-Slotted aluminum extrusion and guarding, metric and fractional. The only limit is your imagination.

Industrial shock absorbers, rotary dampeners, gas springs, velocity and feed controllers, bumpers

Bimba original line air cylinders, rotary actuators, flat cylinders, extruded flat-1 cylinders, slides and rodless actuators, flow controls, position feedback cylinders, electric actuators

High-performance vision inspection and barcode systems and embedded machine laser markers (Handheld, Sensors, Scanners, Readers)

Leader in precision conveyors, wide range of flexible solutions for industrial, FDA approved belt options, packaging and sanitary conveyor automation

Pneumatic and electrical automation, actuators, valves, servo motors, sensors, vision and Fabco-Air

Controllers, VFDs, servo amplifiers and motors, HMI, robots, software solutions, and industrial computers

Multi-venturi vacuum pumps, robot end of arm tools (EOAT), Cobot gripping solutions, suction cups, filters, vacuum switches, vacuum accessories

Full line of innovative safety and automation sensors and controls. Sensors, light curtains, scanners, process controls, distance measurement, encoders, 2-D & 3-D cameras, data readers, and more

Six-Axis programmable robotic arm, built-In Simulator & Vision System, best payload and speed in its class, the world's easiest-to-use robot, made in the U.S.A.

Rod and rodless electric linear motion, pneumatic linear actuators, power transmission, specialty electric actuators and customs

Industrial Automation

Line Card

Specializing in Automation Solutions Since 1985

Flexible feeders for small parts. Vision pick guidance. Flexible, simple, efficient

Automation controllers & I/O, embedded automation computers, human machine interfaces, data aquisition (DAQ) & communication, remote I/O modules, industrial communication

Motion Control - Stepper and servo drives, motors, controllers, gearheads, and power supplies, accessories. Integrated stepper and servo motors

Vane rotary actuators, micro, compact, brute and OEM series, guided rod cylinders, and multi-axis actuators

AC Drives, VFDs, Power management, Servo motors, motion control, PLC and HMIs. Temperature controllers and other field devices

Workholding Equipment and Automation Tooling solutions. Manual, Pneumatic & Power clamping systems. Vertical, Horizontal, swing ,in-line, latch clamps, etc. Pin and Hook-Pin packages

Original Pancake[®] cylinders, stainless steel round-line cylinders, OEM & Standard NFPA standard actuators, Multi-Power[®] and Hi-Power[™] pneumatic actuators and presses, single and multi-axis pneumatic slides, air preparation units, rotary actuators, grippers, interchange actuators, manual/mechanical/solenoid operated valves, and customs

Precision gear reducers, safety and servo couplers

Hydra-Pneumatic cylinders from 1-30 tons, tandem cylinders, Intellicyl series cylinders, presses, pierce and marking units

Cables - Control network, bus, drive and feedback. Cable assemblies and connectors, power supplies, control circuit protection sytems, signal converters

Industrial Automation

Line Card

Specializing in Automation Solutions Since 1985

EOA Tooling - gripping and sensing systems for collaborative robots

A leader in fractional HP motion control offering the XStep line of absolute control closed loop stepper motors, actuators and network drives, stepper motors, servo motors, brushless motor & drives, fixed speed AC motors and a full line of cooling fans

SunX sensor PLC's, servos, HMI's, fiber-optic sensors, photoelectric sensors, inductive proximity sensors, color mark sensors, pressure and vacuum sensors

Compact, precise industrial robots for microautomation, 6-axis and SCARA

SANYO DENKI AMERICA, INC.

Stepper motors and drives, closed loop stepper systems, synchronous motors, brush and brushless servo motors and drives

Collaborative robot. EOA Tooling - gripping and clamping systems, accessories and handling

HMI hardware and software including both panel and box style industrial PCs. Easy to use open architecture and control systems. Flat panels, data collection hardware and software.

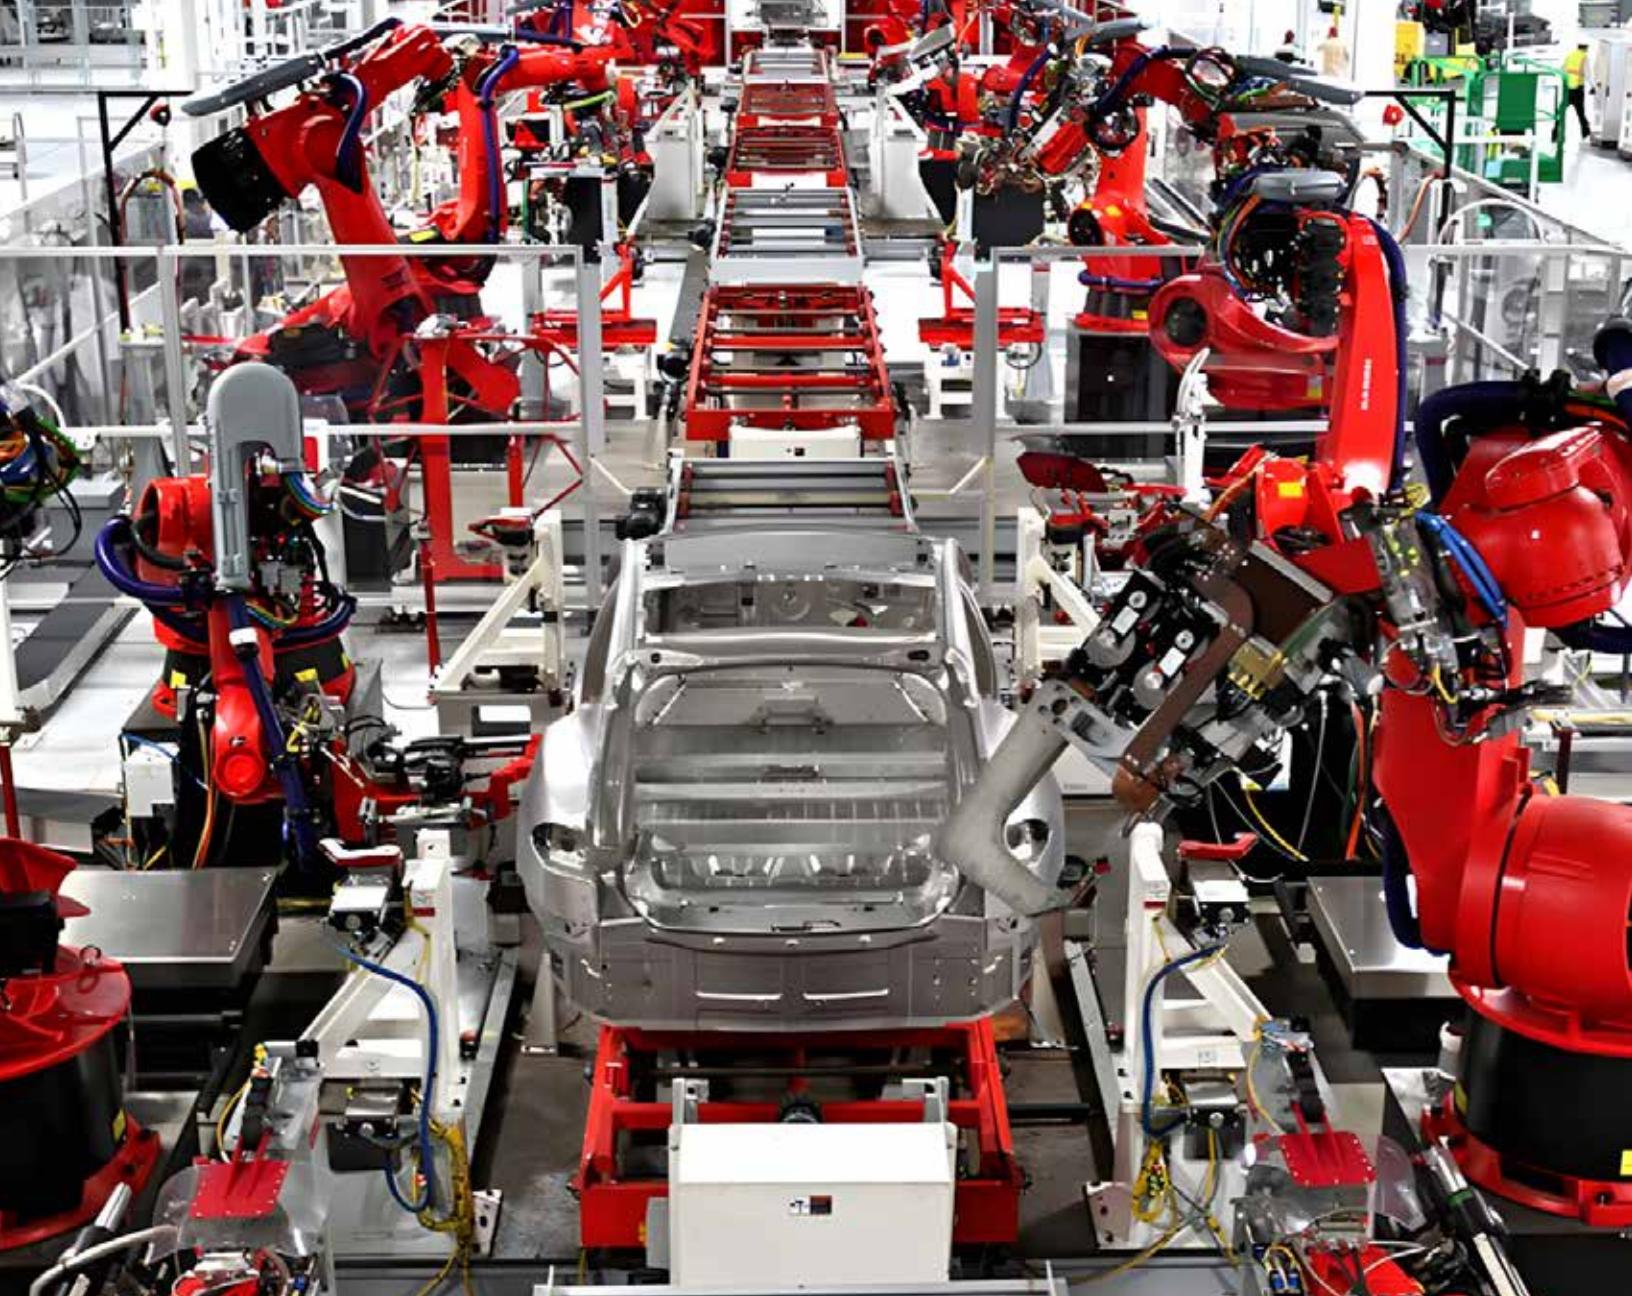

Wide range of programmable electric actuators based on Moving Coil Technology. Force, position, and speed are fully programmable. High speed, high accuracy, high repeatability

Vision/Data Services: Inspection development/programming, data reading and marking, guidance, robotics.

Value-Add Services: Component assembly, motion control, robotics, programming, control cabinets

Representation Throughout Texas, Oklahoma, Louisiana, Arkansas, and Northern Mexico
